

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

NOTES AND ABBREVIATIONS.

1. All names in Part 2 are arranged alphabetically, and where there are more than one of the same name they appear according to priority of service.

2. An ★ before a name indicates that the officer attained the rank of Brigadier or Major-General either by regular or brevet commission in the Regular or Volunteer forces.

3. Following the name of each officer will be found, 1st, the State or Country where born, and, 2d, the State from which originally appointed; but when this appears only once it indicates the State whence appointed, the place of birth not being known.

4. **Cadet M A** in bold face type indicates that the officer graduated at the United States Military Academy; the adjoining date when he entered that institution; the figure in parenthesis his standing in the graduating class, and his first appointment the date of his graduation. After 1800 the years are expressed by the last two figures—thus, 1801, 01; 1856, 56, etc.

5. All data relating to appointments or commissions has been obtained from original records of the War Department, supplemented from other authentic sources, or supplied by living officers or the families of those deceased.

6. No record is herein given of appointments or commissions that were not accepted. Such as were declined, revoked or cancelled, and under which no service was rendered, have been omitted.

7. All commissions, appointments, promotions, casualties, etc., subsequent to September 29, 1889, have been added or revised up to the time each page was put in type.

8. A work of this dimension, covering so long a period, although compiled and revised with the utmost care, will doubtless contain some errors or omissions, and the editor will take it kindly to be informed of any that may be discovered.

PREFACE.

From the close of the Revolutionary War to September, 1789, there was practically no United States Army. A regiment of infantry and a battalion of artillery, in all about 700 officers and men, were retained at the close of the war to guard public stores and property and to occupy posts vacated by the British on the northwest boundaries of the United States. By act of Congress of June 3, 1784, it was resolved, "As it appears absolutely necessary to have 700 non-commissioned officers and men properly officered, it is recommended to the following States as most convenient to the posts shortly to be vacated by the British to furnish from their militia: Connecticut, 165; New York, 165; New Jersey, 110; Pennsylvania, 200, to serve 12 months, unless sooner discharged."

The troops thus provided for were formed into a regiment, consisting of 8 companies of infantry and 2 companies of artillery, under the command of Lieut.-Col. Josiah Harmar.

By subsequent legislation slight changes were made in the number and organization of the troops, and the re-enlistment of the 700 men engaged under the resolution of April 12, 1785, was authorized by Congress October 3, 1787. This force, then consisting of a battalion (4 companies) of artillery and a regiment (8 companies) of infantry, was, by the act of September 29, 1789, "recognized to be the establishment for the troops in the service of the United States."

No appointments or commissions had been issued by the General Government, the officers holding their appointments from the States which had furnished the quota. The officers retained in service were all commissioned as of the United States Army from September 29, 1789.

In this work, therefore, service prior to September 29, 1789, is only referred to as in the Revolutionary or Continental army, and date of rank, etc., therein is not stated, as there are no complete records extant, so far as known, that could supply the data.

Having been an employé in the office of the Adjutant-General of the Army during the past 24 years, I became thoroughly familiar with all the records pertaining to appointments, commissions and the service of officers of the army, and obtained the permission in 1873 of Gen. E. D. Townsend, then Adjutant-General of the Army, to engage in compiling this work. The privilege thus accorded me was courteously extended by his successor, Gen. R. C. Drum, to whom I am deeply indebted for unlimited access to any and all records in his department.

Everything relating to the appointment of officers was destroyed by the burning of the War Department, November 9, 1800, and again partially by the British, in 1814. It therefore became necessary, in order to supply the missing links, to search the Executive journals of the United States Senate, pay accounts in the Treasury Department, old manuscript registers in the possession of families or descendants of deceased officers, etc. In brief, neither labor nor expense has been spared in securing the most reliable information possible, and a slight conception of the magnitude of the task may be gathered from the fact that I have diligently applied myself, when not engaged in official duties, for 17 years in the effort to produce this compilation, in the hope that it may be a standard and reliable work of reference.

F. B. HEITMAN.

NOTE.—The act of March 2, 1821, provided that the 4 regiments of artillery should each consist of 9 companies, 1 company of each regiment to be designated and equipped as light artillery. The act of July 5, 1838, added 1 company, and the act of March 3, 1847, added 2 companies to each regiment of artillery. The act of Feb. 11, 1847, authorized 2 Majors and a Quartermaster to each regiment in the army, and under the act of March 3, 1847, the President was authorized to designate an additional company in each regiment of artillery to be equipped as light artillery. By the act of July 28, 1866, the 1st, 2d, 3d and 4th regiments of artillery were allowed 3 Majors, and companies were designated batteries. The designation "Battery" will be applied to companies of artillery not mounted, and the designation "Light Battery" to those mounted.—Adjutant-General, May 20, 1871.

It will be observed that in the 8 regiments of infantry (18th to 25th inclusive) organized by the act of June 26, 1812, many of the field officers have a date of rank anterior to the act of Jan. 11, 1812. They were nominated and confirmed as officers of infantry under the act of Jan. 11, 1812, and were originally intended for the 10 additional regiments of infantry (5th to 17th inclusive). The assignment to regiments of all the officers was not made until after the act of June 26, 1812. Subsequently a board of officers was appointed to consider the date of rank and prior service in the army or militia of the officers and to report under the act of Jan. 11, 1812, and upon their report the date of rank was ascertained. See (section 3) act of March 17, 1812, and the Army Registers for 1812 and 1813. In this compilation the original date of rank is adhered to.

LEGION.

THE LEGION OF THE UNITED STATES.

March 5, 1792, to Nov. 1, 1796.

Organized under section 3 of the act of March 5, 1792. Section 2 of the act of March 5, 1792, authorized the raising of 3 additional regiments of infantry, a squadron of dragoons, and also directed the completion of the 2 regiments of infantry and the battalion of artillery then in service. Section 3 of the same act provided "That it shall be lawful for the President of the United States to organize the said 5 regiments of infantry and the said corps of horse and artillery, as he shall judge expedient, diminishing the number of corps and adding to another, as shall appear to him proper."

* * * Under the provision of this section, and upon the recommendation of Gen. Henry Knox, the then Secretary of War, President Washington directed the formation of "The Legion of the United States." On April 9, 1792, the President nominated to the Senate 6 Majors for the "proposed 3d and 4th legionary corps," 3 to each; also Surgeons and Surgeons' mates for the "4 proposed legionary corps." On Sept. 4, 1792, Maj.-Gen. Anthony Wayne, then Commander-in-Chief, in General Orders, dated Pittsburg, Pa., announced and prescribed the formation of the Legion of the United States, which was to consist of 4 sub-legions, each sub-legion to be commanded by a Brigadier-General. On Dec. 27, 1792, Congress was informed of the President's action. In the formation of 1st and 2d sub-legions, the 1st infantry became part of the 1st sub-legion and the 2d infantry part of the 2d sub-legion. The legion, however, was not fully completed until the Spring of 1793, when, instead of a Brigadier-General to command a sub-legion (several having declined the appointment of Brigadier-General), the President nominated officers to the rank of Lieutenant-Colonel as commanders of the 4 sub-legions.

In the 1st and 2d sub-legions the field officers are shown as beginning with Sept. 4, 1792, and in the 3d and 4th sub-legion date of actual rank is stated.

On Nov. 1, 1796, under the act of May 30, 1796, the President arranged and completed out of the legion 4 regiments of infantry and 2 companies of light dragoons, forming the regiments as far as practicable, so that the infantry of the 1st sub-legion again became the 1st infantry and of the 2d sub-legion the 2d infantry. The infantry of the 3d sub-legion became the 3d infantry, and of the 4th sub-

legion the 4th infantry. Officers and soldiers not retained were discharged Nov. 1, 1796, with 6 months' pay and subsistence.

Order showing the formation of "The Legion of the United States."

"In pursuance of the orders of the Secretary of War, I, by virtue of the powers and authority vested in me by the President of the United States, the following shall be the arrangement of the officers of the 4 sub-legions in the Army of the United States:

A black and white photograph showing a large, dense crowd of people, likely soldiers or men, gathered in an open field. They are standing in rows or clusters, facing towards the right side of the frame. The background is a bright, overexposed area, possibly a sky or a large open space. The overall tone is somber and historical.

*Taken from the line and excluded from the total commissioned and aggregate.

This act gave one additional regiment of "artillerists and engineers" to the force then in service. The 1st section of March 3, 1796, repeals the act of May 30, 1786, together with all the other parts thereof as relates to the Major-General and his staff and the Brigadier-General, and provides for the staff given in this organization. The staff provided for consists of 1 Quartermaster-General, 1 Paymaster-General, 1 Brigade Major, 1 Brigade Inspector and 1 Judge Advocate, the last 3 to be taken from the line. The law is very vague and obscure with respect to the character and rank of the 2 first-named staff officers. [Vide 3d section act 3 March, 1797, and section 12 of the act of May 30, 1786.] Those taken from the line received \$25 additional pay per month.

27. Taken from the line and excluded from the total commissioned and aggregate.
28. This act authorizes the President to raise to the military establishment 12 regiments of infantry and 6 troops of light dragoons which, together with the troops previously in service, shall form a regiment.
29. The organization of the whole body of infantry is changed; 3 additional Brigadier-Generals, 1 Inspector of the artillery and 4 Chaplains are provided for. He is authorized to appoint 4 teachers of the arts and sciences for the instruction of the artilleryists and engineers (who are considered to be more civil than military officers).

The 1st act of March 2, 1799, regulates the medical establishment and gives 1 Apothecary-General, 2 Deputies, 1 Purveyor and a suitable number of Hospital Surgeons' Mates. The 2d act of March 2, 1799, gave eventual authority to the President to augment the army by raising, in addition to the military force of the United States, 24 regiments of infantry, 1 regiment and 1 battalion of riflemen, 1 battalion of artillery and engineers, 3 regiments of cavalry, which are included in the above organization. The 1st and 2d sections of this act expired by the operation of the 11th section; that is, the expiration of the next ensuing session of Congress.

The above act (March 3, 1799,) recognized the whole military establishment, authorizes the appointment of a commander of the army to be styled "General of the Armies of the United States," and abolishes the title of Lieutenant-General; gives a Quartermaster-General, with Division Quartermasters, Brigade Quartermasters, Deputy Quartermaster-General to be ex-officio Deputy Adjutant-General; the Adjutant-General of the army, with the rank of Major-General; Deputy Quartermaster-General of the army to be ex-officio Assistant Inspector-General, with Division Inspectors and Brigade Inspectors; Deputy Paymasters, 2 Engineers separate from the corps of artillery and engineers, 1 Inspector of Fortifications, and provides that Cornets and Ensigns shall thereafter be styled Second Lieutenants, the same number of officers and men as a battalion of infantry, and Assistant Inspectors, Assistant Adjutant-General, Division and Brigade Quartermasters, Deputy Paymasters, the Inspector of Artillery, Inspector of Fortifications, Aides-de-Camp and Judge Advocate to be taken from the line.

It will be seen that the Adjutant, Quartermaster and Paymaster of each regiment are, in addition to the number of subalterns, required for the complement of company organization.

The rank of General was not conferred upon General Washington, for whom it was intended, and he remained in service as Lieutenant-General until his death, nor was the Quartermaster-General appointed to the rank of Major-General.

NOTE.—This act authorizes the President to discharge, on or before the 15th of June ensuing, all such officers, non-commissioned officers and privates as were appointed, commissioned or raised under and by virtue of the acts of July 16, 1798, and March 3, 1796, except the Engineers, Inspector of Artillery and Inspector of Cavalry, who are authorized to continue in service until they shall have attained the age of sixty years; provided that "nothing contained in this act shall be construed to authorize any reduction of the 1st 4 regiments of infantry, the 2 regiments of artillery, the 1 regiment of dragoons, the 1 regiment of light dragoons, the 1 regiment of horse artillery, the 1 regiment of engineers, the 2 troops of light dragoons and of the General and other staff authorized by the several laws for the establishing and organizing of the aforementioned corps," leaving the military establishment above, including the officers of the Medical Department under the law of March 2, 1797, which act was not repealed.

* Taken from the line and excluded from the total commissioned and aggregate.

Under this act the infantry of the United States was fixed at 25 regiments and organized as above. One riding-master was added to the regiment of light dragoons raised by the act of January 11, 1812, and one Surgeons' Mate to the regiment previously raised. One master of the sword was allowed to each. The military establishment authorized by law previous to April 12, 1808, and the additional military force raised by virtue of the act of April 12, 1808, are incorporated, and promotions now take place throughout each line respectively. The act of March 2, 1812, establishes a quartermaster's department, to consist of 1 Quartermaster-General with the rank pay and emoluments of a Brigadier-General, 8 Deputy Quartermasters and as many assistants as the service might require, the deputies and assistants to be taken from the line or not. It appears that both these grades were taken from the line except 1 deputy and 4 assistants. One Commissary-General of Purchases was authorized, with as many Deputy Commissaries as the service might require, and provides for "4 conductors of artillery" (to be allowed the pay and emoluments of a Lieutenant of artillery). Military agents and assistants discontinued. The act of April 22, 1812, makes further provision for the corps of engineers by the addition of 2 Captains, 2 First and Second Lieutenants, with 1 Paymaster from the line, 4 Sergeants, 4 Corporals, 1 teacher of music, 4 musicians, 19 artificers and 63 men, to be styled a company of "bombardiers, sappers and miners." eral of Ordnance, with the rank, pay and emoluments of a Colonel of infantry, 1 Assistant Commissary-General, 4 Deputy Commissaries and as many Assistant Deputy Commissaries of Ordnance as might be necessary.

The act of May 16, 1812, empowers the President to appoint as many District Paymasters as the service might require, and a Paymaster to each regiment, with the pay and emoluments of a Captain of the regiment to which they belonged. The District Paymaster might be taken from the line or otherwise. It appears 10 of them were not of the line. Secretary to the commanding General, Sub-Inspectors to each brigade and 12 drivers of artillery to each company of light artillery were also provided for. As many Hospital Surgeons and Mates are authorized by the law of January 11, 1812, as the service might require, but the number not being defined they are set down according to the act of April 12, 1808.

(The 6 companies of rangers authorized by the act of January 2, 1812, are continued.)

The act of February 24, 1812, authorizes the appointment of a saddler and farrier to each company of light artillery when mounted.

The forage-masters were not to exceed one to each brigade, and the deputy barrack-masters one to each separate barrack or cantonment. The corps of artificers might be taken from the privates of the army by authority of the commanding General, or from citizens by the superintendent, the superintendent to be appointed by the President. The Commissary-General of Ordnance was authorized from time to time to employ as many wheelwrights, carriagemakers, blacksmiths and laborers as the public service might in his judgment require.

The act of July 5, 1813, provides that 5 of the regiments of infantry raised by the act of January 29, 1813, might be, at the discretion of the President, enlisted for and during the war, and limited, as to service, to the defense of the seaboard of the United States, or such parts thereof as the President might elect and determine. The 2d act of August 2, 1813, authorizes the appointment of 5 additional Deputy Commissaries of Ordnance. The act of January 23, 1814, empowered the President to cause to be enlisted, for the term of 5 years or during the war, 14 of the regiments of infantry authorized by the act of January 29, 1813, or such number of them, or the troops composing the same, as in his opinion would best promote the public service. The act of February 10, 1814, provides for 8 additional regiments of riflemen, and increases the companies of the regiment authorized by the act of April 13, 1808, to 90 men.

The act of March 30, 1814, provides that the 1st, 2d and 3d regiments of artillery be formed into one corps and organized into 12 battalions and 48 companies, one of the Second Lieutenants of each company to act as conductor of artillery for said companies. That, in lieu of the second regiment of dragoons then in service, there should be organized one regiment, to consist of 8 troops. As many Assistant Apothecaries were authorized as the service might require, and it is further enacted

that "promotions shall be made through the whole army in its several lines of light artillery, light dragoons, artillery, infantry and riflemen respectively." That in no case shall District Paymasters or Quartermasters of any grade be taken from the line of the Army. The last section of this act enacts "that the officers of the volunteer corps authorized by the act of February 24, 1814, be entitled to promotion in the line of the Army, and that the President of the United States, with the advice and consent of the Senate, be authorized to make all necessary appointments, and to fill all vacancies which may happen in the same." Under the authority granted by this section 4 additional regiments of infantry were raised from volunteer corps, making 48 regiments. Two of these were discontinued May 12, 1814, and the other 46 are given in the Army Register of January 1, 1815. Military storekeepers authorized by the act of March 3, 1813, number unlimited. By the act of July 26, 1813, 10 companies of sea fencibles were authorized to be employed, as well on land as on water, for the defense of the ports and harbors of the United States. (a) With the rank of Colonel of cavalry. (b) With the rank of Brigadier-General. (c) With the rank of Major. Taken from the line and excluded from the total commissioned and aggregate. Although the law provides for only 9 companies to a regiment of artillery, there are 10 Captains, the supernumerary being for ordnance duty, that department having been merged into the artillery by this act. Fifty-six enlisted men of ordnance are provided for also. Number of Assistant Commissaries of Subsistence to be taken from the line limited to 50, and subject to duty in the Quartermaster's Department. The Medical Department remodelled. This law requires the Aides-de-Camp of Brigadiers to perform the duties of Assistant Adjutant-Generals.

The two commissions held by these officers are of unequal grades, and hence they are not affected by the 7th section of the act of June 18, 1846.

The Adjutants of artillery and infantry (12) and all the regimental Quartermasters (15) being taken from the subalterns and accounted for in their several regiments as belonging to companies, to avoid counting them twice, are excluded as regimental staff officers from the columns of "total commissioned officers" and "aggregate" of their respective regiments.

The 8d regiment of artillery having two principal musicians enlisted under the act of August 3, 1847, retains them under the act of June 19, 1848. When by casualties their places become vacant they are not to be filled.

(A) By the act of June 17, 1850, cited in the preceding note (section 2), the President is authorized, whenever the exigencies of the service require it, to increase to 74 the number of privates in any company "serving at the several military posts on the Western frontier and at remote and distant stations." In the table the minimum or fixed organization is given, viz., 50 privates to a company of dragoons, 64 to a company of light artillery and riflemen and 48 to the artillery and infantry. Under the authority conferred upon him, the President has directed that the number of privates be carried up to 74 in the several companies serving in the Peninsula of Florida, and on the Island of Key West in the same State, in Texas, New Mexico, California and Oregon, as well as those stationed at Forts Snelling and Ripley, on the Upper Mississippi; Fort Ridgely, on the Minnesota River; Fort Riley, on the Kansas; Fort Gibson, on the Arkansas; Fort Arbuckle, on the False Washita River, and Forts Kearny and Laramie, on the Oregon route, and the several companies engaged in the Sioux expedition, and all the companies of the 10th infantry, which regiment is destined for distant frontier service. There being at this time 181 companies serving at or en route to these distant stations, the authorized increase in the number of privates is 5,164, making the "total enlisted" (as the troops are now posted or en route) 16,823 and the "aggregate" 17,832. If all the companies belonging to "regiments" (198) were serving at the distant stations described, the additional number of privates allowed would then be 5,620, thus increasing the "total enlisted" to 17,278 and the "aggregate" to 18,318.

(C) By the act of March 3, 1853 (section 9), a Lieutenant of engineers, topographical engineers and ordnance having served "14 years' continuous service as Lieutenant" is entitled to promotion to the rank of Captain; but such promotion is not to increase the whole number of officers in either of said corps beyond the number previously fixed by law.

The number authorized is consequently 443. There are none now attached to the Army.

ern frontier, and at remote and distant stations." In the table the minimum or fixed organization is given, viz, fifty privates to a company of dragoons, sixty-four to a company of light artillery and riflemen and forty-two to one of artillery and infantry. Under the authority vested in him, the President has directed that the number of privates be carried up to seventy-four in the several companies serving on the coast of Florida, in Kansas, Nebraska, Utah, Texas, New Mexico, California, Oregon and Washington Territory, as well as in those stationed at Fort Ripley, on the Upper Mississippi; Fort Ridgely, on the Minnesota River; Fort Arbuckle, on Wild Horse Creek; Fort Washita, on the False Washita River, or elsewhere in the Indian country west of the Mississippi. There being sixty-nine companies serving at or en route to these distant stations, the authorized increase in the number of privates is 1,974, making the "total enlisted" (as the troops are now posted or en route) 39,238 and the "aggregate" 41,247. If all the companies belonging to the old "regiments" (196) were serving at the distant stations described, the additional number of privates allowed would then be 5,620, thus increasing the "total enlisted" to 44,858 and the "aggregate" to 44,993.
